REMARKS _____		
RETURN TO CIA LIBRARY		

1. Twenty-one aircraft were parked west of the airfield buildings at Strausberg (N 53/V 15) airfield on 11 October 1950. Twenty-five to thirty twin-engine aircraft with double rudder assembly and covered with tarpaulins were south of these buildings. * There was no flying activity between 3:30 and 5:45 p.m. in gusty weather.
2. No radar set was noticed at the field or its vicinity. Just as in the spring of 1950, construction work was being done in the south-eastern section of the landing field. The landing field was being rolled. **

- * [REDACTED] Comment. The occupation of Strausberg airfield has apparently not changed since 20 September 1950. [REDACTED]
- ** [REDACTED] Comment. Major construction work at the field has not been reported. The activities which were observed are apparently minor leveling work on the landing field.
